Visit Now: www.acutilabs.com

Here are few reasons that make AcutiPay an Unique and Powerful Platform -

World class billing standard

With world class billing and subscription management solution, AcutiPay is developed with the latest SAP BRIM technologies with keeping the flexibility of users in mind. It is robust, secure, and fully transaction platform that is developed as cloud service with user-friendly interface.

Designed with Powerful SAP foundation

It is SAP's powerful platform that is customized for automotive application with the usage of same products as used by apple to power iTunes. It comes with multiple access point web, mobile and dashboard and supports multiple billing types that includes consumption-based charging.

Handles multiple types of Transaction

It is a smart platform that comes with the capability of handling various types of transactions. From subscriptions and bundling to consumption-based charging and handling digital and physical products, it efficiently works for all

This powerful platform is owned by Acuti Labs, which is a specialist SAP consulting firm headquartered in London, UK, servicing clients globally for 'Consume to Cash' process transformation and optimization.

With SAP BRIM Technology

- ✓ Integrates innovative services from third-party providers into the AcutiPay platform.
- ✓ Makes drivers life easy by enabling quick, convenient, one-click payment for services.
- ✓ Generates single bill for every service the vehicle takes, right from parking to tolls to in-car entertainment.
- ✓ Consolidates billing and invoicing from partners and third-party providers into a single system.
- ✓ Onboard partners' existing services, offerings, and loyalty programs seamlessly.
- ✓ Manages large number of recurring subscriptions efficiently
- ✓ Delivers billing information and driver data to partners reliably and securely.
- ✓ Simplifies revenue management significantly.
- ✓ Reduce deployment time of new connected car services from months to weeks.
